

Eyesite surgeon Simon Levy has been selected by an independent panel of GPs, surgeons and physicians to be included in a guide featuring Britain's top 250 consultants.

Produced as a supplement by Tatler magazine, the 'Doctors Guide', now in its fourth edition, recognises the brightest and most respected surgeons, doctors and medical experts in the UK.

The Tatler Doctors Guide states: 'Dr Simon Levy is a front-of-the-eye kind of guy – cataract and cornea surgery, eye-surface problems, red eyes and allergies. His refractive cataract surgery involves customising lens implants to maximise quality of vision and minimise the need for glasses. Unassuming and able to put patients at ease, he also performs laser surgery to treat short- and long-sightedness and astigmatism.'
